APAD

Introducing APAD

The first DeFi accelerator for the APTOS network & SUI network. APAD is a decentralized accelerator and IDO platform, connecting early-stage APTOS & SUI innovators with our community of contributors. This ecosystem will be powered by the \$APAD token opening APTOS & SUI DeFi to the world.

We strive to empower crypto projects with the ability to raise liquidity on 2 of the safest and most scalable Layer 1 blockchain - Aptos & SUI.

With Aptos building the safest and most scalable Layer 1 blockchain for the next billion users, APAD has engineered from the ground up to empower Aptos project owners (both Token & NFT), by offering a strategized token launch experience with customized launch models, time period, accepted token types and auction algorithms.

Benefits

Creating new projects and liquidity for APTOS

Allowing projects to access the APTOS Network with ease

Early and Fair access for APTOS community to participate in upcoming projects

APAD is backed by top KOLs that will help boost our project's success

APAD Growing APTOS

Increase Brand Awareness for APTOS

Opening new ecosystems in APTOS DeFi

Create a new generation of users for a the new DeFi Ecosystem

Increase liquidity on the APTOS Network

Why APTOS

Though it's not fully operational yet, the Aptos blockchain is already hitting impressive targets. Currently, it can process 130,000 transactions per second (TPS) while maintaining security and reliability. A few revolutionary concepts are at work behind Aptos' impressive performance.

THE HYPE

Decentralized with
awesome scalability

Ultra low transaction
costs for easier
participation

High speed and
performance network

This is where all the
HYPE is

Road Map

2022 Q3

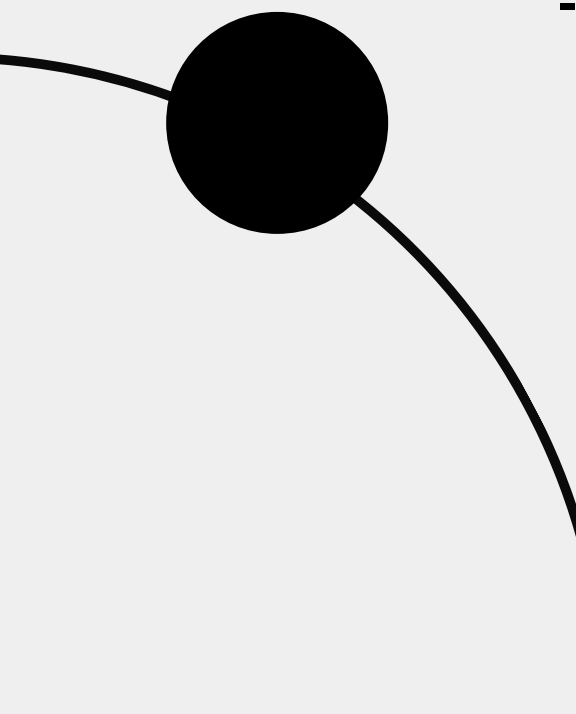

- Project Inception
- Fundraising
- Community Building
- Testnet Deployment

2022 Q4

- Mainnet Deployment
- TGE
- Launchpad MVP
- Smart Contract Audit

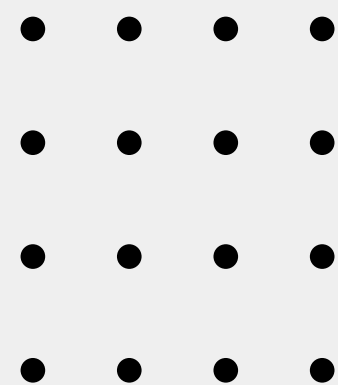

2023 Q1

- DEX Inception and Development
- Liquidity Mining Protocols
- SUI Deployment

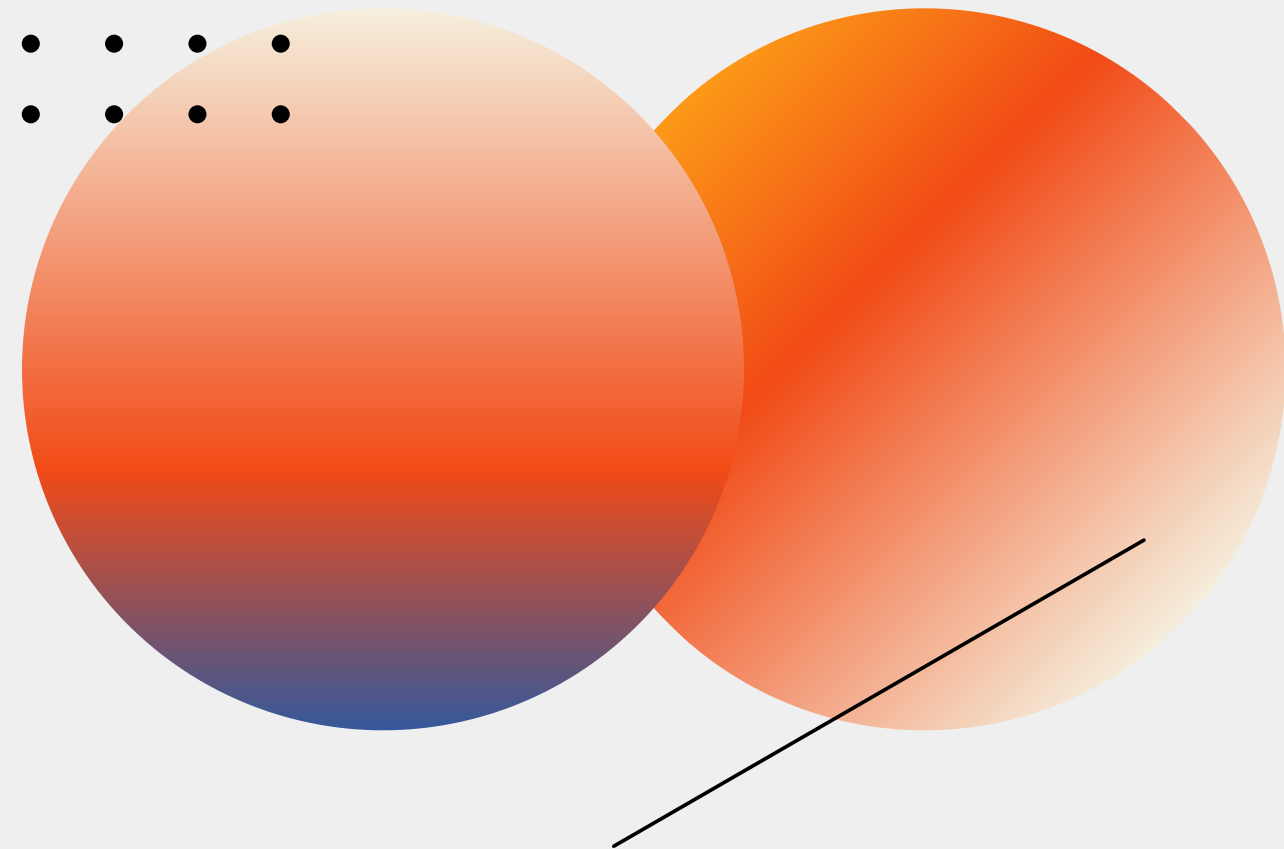

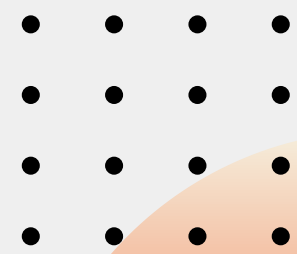

APAD Fair Launch Model

Fair Token Launches (F-L) on average outperform most traditional Tokenomics. The comparative advantage of Fair Launches derives largely from their ability to remedy many of the perceived inequitable token launch practices

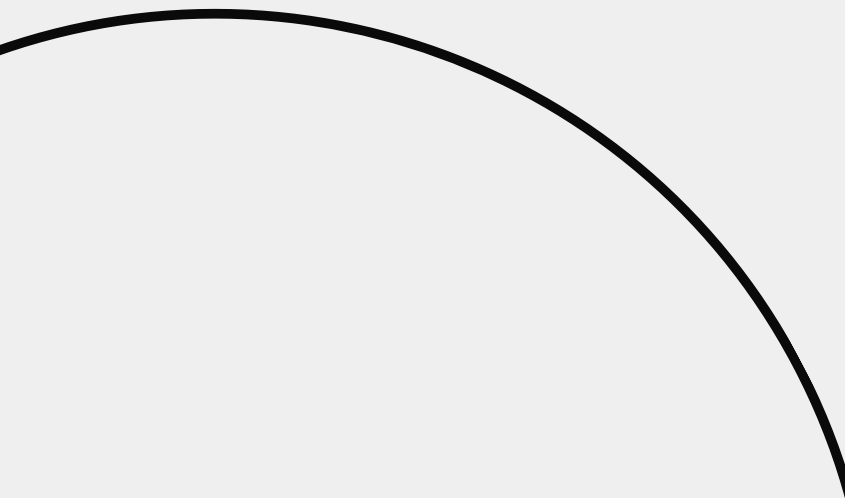

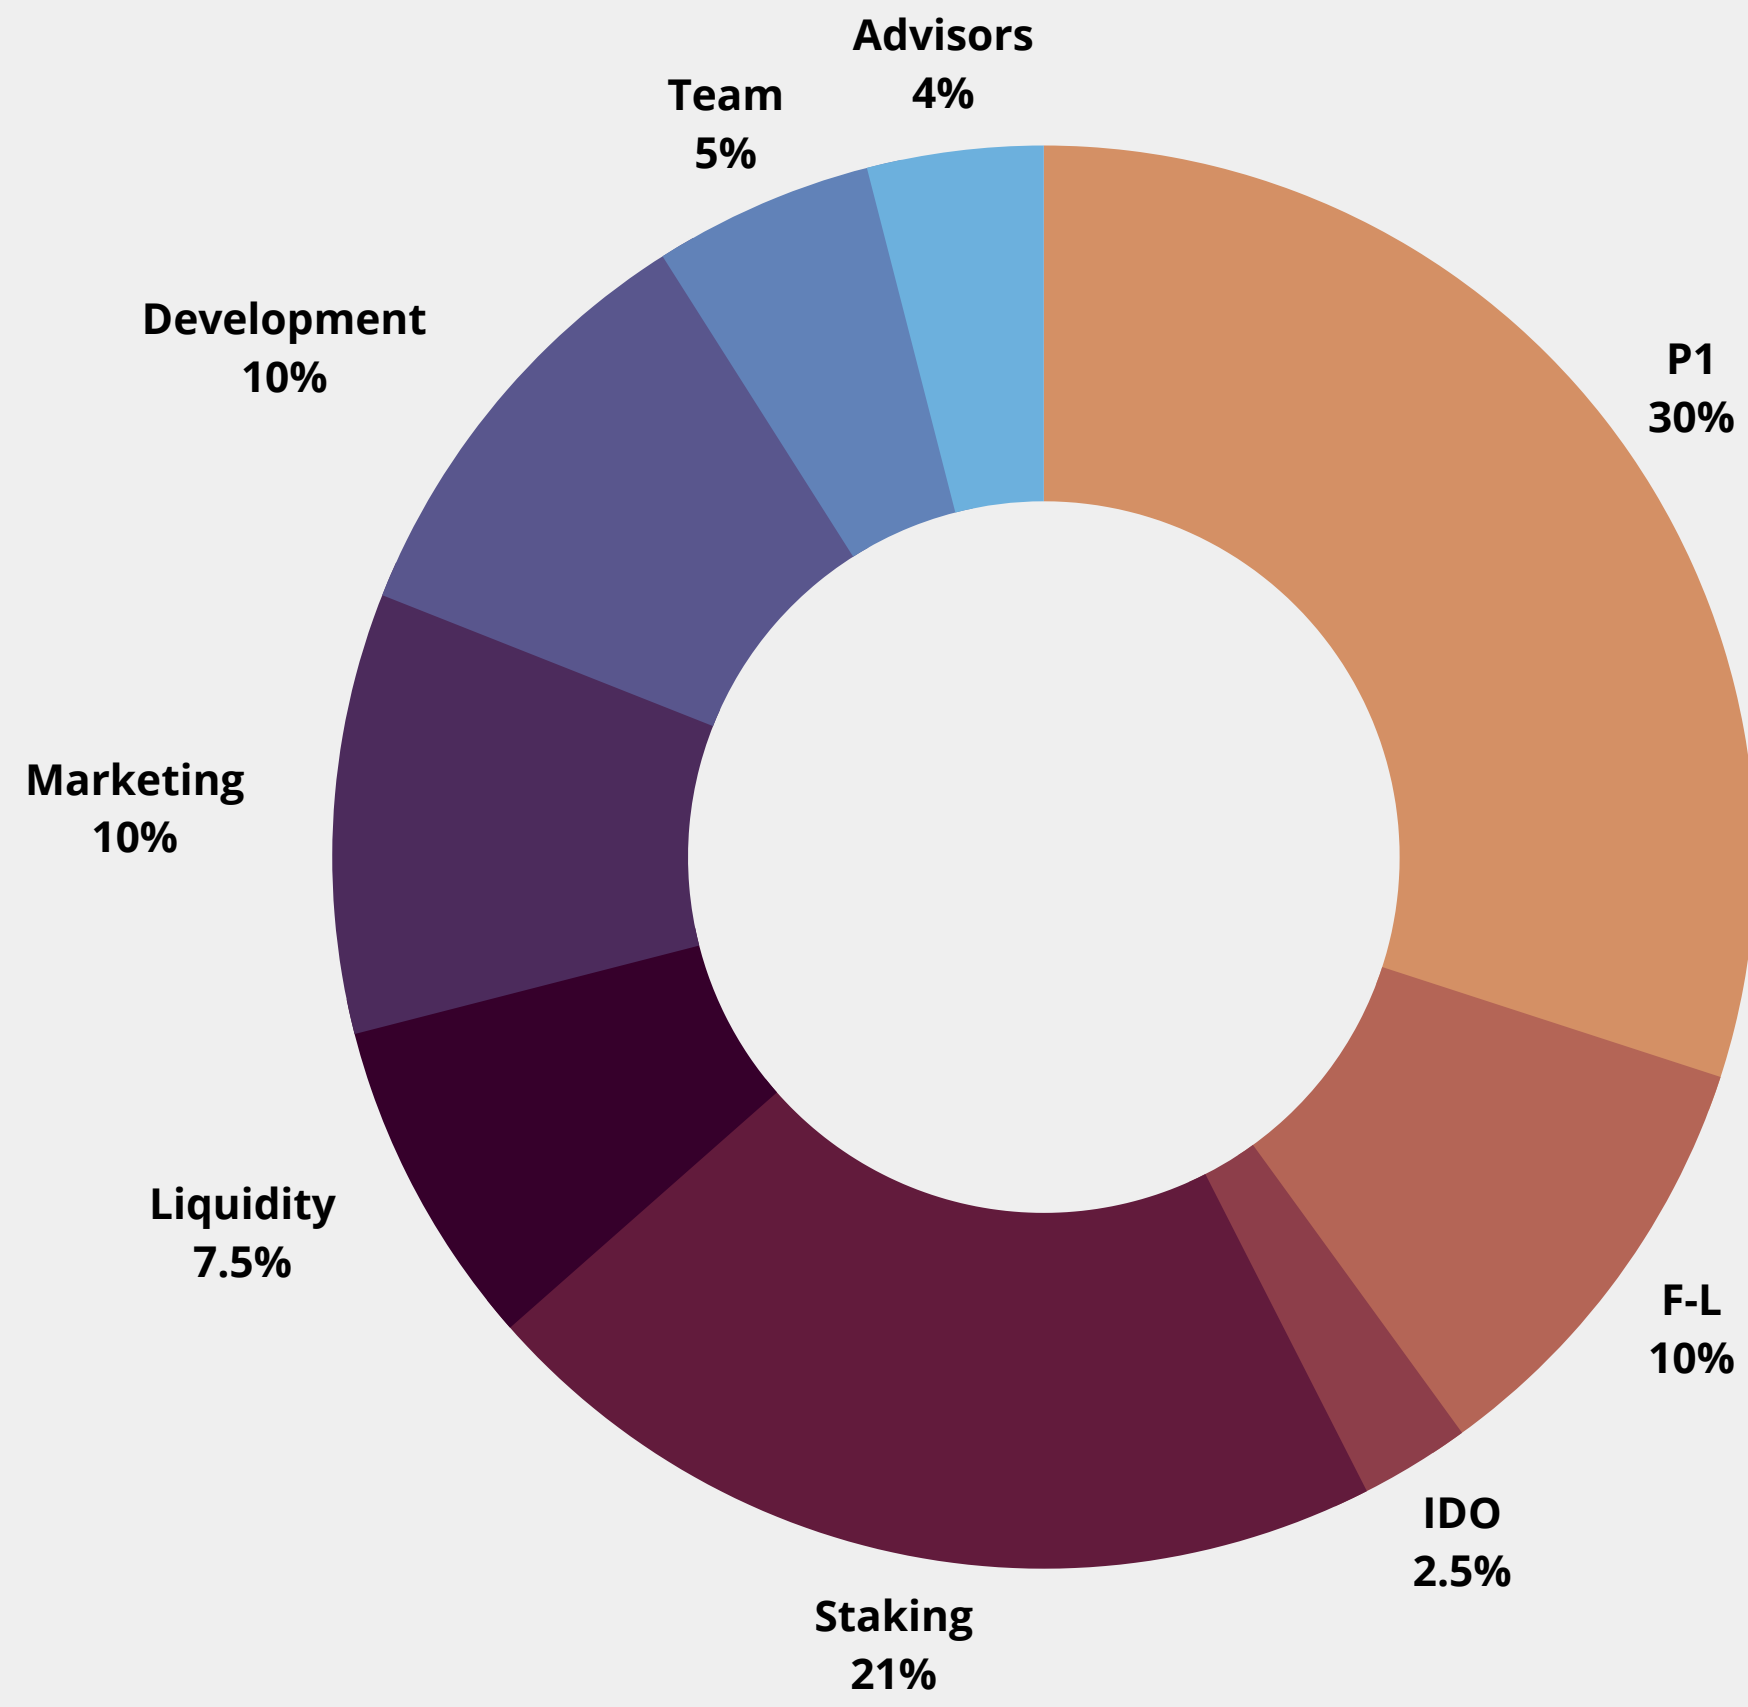

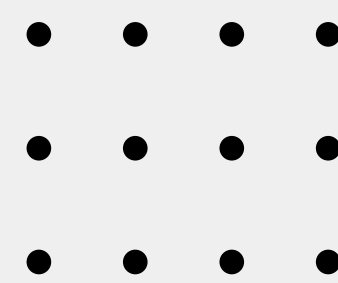

APAD's Seed round was conducted for the 2 main goals of Liquidity provision and development. The main distribution of the tokens to the public will be done through a F-L model to ensure equal participation and a more equal distribution of Tokens at TGE. This creates an anti-whale effect

APAD Investment Opportunity

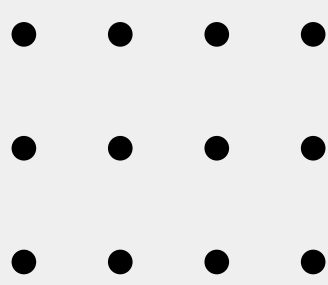

Any participating investor will receive a profit share from APAD depending on the ticket size. APAD will reward its investors with a revenue share of tokens made from the APAD IDO platform. The APAD revenue model will require participating projects to assign a % of the token economy from the project to APAD. 50% of the allocated token economy will be allocated to the APAD platform and 50% will be distributed to investors. This will allow all APAD investors to participate in new and upcoming projects on the APTOS & SUI Networks.

Tokenomics

Tokenomics

Rounds/Months	1	2	3	4	5	6	7	8	9	10	11	12
Seed	30%	cliff	cliff	7.7%	7.7%	7.7%	7.7%	7.7%	7.7%	7.7%	7.7%	7.7%
Fair Launch Model	35%	cliff	cliff	7.2%	7.2%	7.2%	7.2%	7.2%	7.2%	7.2%	7.2%	7.2%
IDO	100%	0	0	0	0	0	0	0	0	0	0	0

- Long-term vesting with milestones planned ahead
- Initial market cap of \$900,000 on TGE
- IDO price \$0.06
- Total token supply 100,000,000
